

**Position Title**

Research Electronics Engineer, Research AST  
Electronic Instrumentation Systems

**Organization**

D331 / REVOLUTIONARY AVIATION TECH  
BRANCH

**NASA Announcement Number**

LA13D0016

**Vacancy Type**

Case File

**OPM Control Number / Status**

337577700 / Posted

**Salary Range**

\$96,690 - \$147,857

<http://www.usajobs.gov/GetJob/ViewDetails/337577700>

**Open Dates**

02/12/2013 - 03/05/2013

**Pay Plan - Series / Grade (Low, High, Potential)**

GS - 0855 / 14, 15, 15

**Position Information**

Full-Time / Permanent

**Duty Location**

511180650 - Hampton, VA (1)

**Who May Be Considered**

This announcement is open to all qualified U.S. citizens.

**Citizenship Required**

True

**Job Summary**

This Research Electronics Engineer in the Revolutionary Aviation Tech Branch identifies, researches, and develops innovative technologies and methodologies that will revolutionize the performance and capabilities of future air vehicles.

This position requires a Top Secret Security Clearance.

**Comments**

To receive consideration, you must submit a resume and answer NASA-specific questions. The NASA questions appear after you submit your resume and are transferred to a NASA web site. If you successfully apply, USAJOBS will show your application status as 'resume received - complete.' If your status is 'Application Started,' you have not successfully applied. Do not rely on a USAJOBS email to confirm successful application only an email from NASA confirms a successful application.

Management may select at either the GS-14 or GS-15 level. Selectee will be eligible for non-competitive promotion to the target grade level when eligible and recommended by management.

**Marketing Summary**

NASA, the world's leader in space and aeronautics is always seeking outstanding scientists, engineers, and other talented professionals to carry forward the great discovery process that its mission demands. Creativity. Ambition. Teamwork. A sense of daring. And a probing mind. That's what it takes to join NASA, one of the best places to work in the Federal Government.

## **Key Requirements**

1. Relocation expenses will not be paid.
2. Selectee must complete a financial disclosure statement
3. A one-year probationary period may be required
4. This position requires a Top Secret Clearance
5. This is a drug-testing designated position

## **Total number of openings**

1

## **Major Duties**

Serves as Senior Research Electronics Engineer performing research in the area of theoretical simulation techniques. Investigates and matures high-risk, high-payoff technologies by conducting experimental and computational research; assesses, develops, and applies advanced experimental and computational methods; and conducts multidisciplinary systems analysis studies to identify critical enabling technologies and to determine the system level benefits of these emerging technologies. Utilizes state-of-the-art theoretical and computational tools used to address complex electromagnetic (EM) issues. Applies EM Theory and EM Codes in design, design analysis, and prediction of the EM characteristics of various component designs. Formulates and plans relevant research efforts and leads small work groups and teams in executing and reporting the research effort. Evaluates research proposals and provides technical guidance on a wide range of topics for NASA and industry. Serves as a Project Manager and is responsible for conceiving, planning, conducting and managing research to develop innovative technologies and methodologies of advanced computational electromagnetic (CEM) tools.

## **General Qualifications**

Applicant must have one year of specialized experience equivalent to the next lower grade level, which has equipped the applicant with the particular competencies needed to successfully perform the duties of the position described above.

Specialized experience for the GS-14 level includes utilizing computational tools to address complex electromagnetic (EM) issues, utilizing codes to analyze and predict the electromagnetic characteristics of various component designs, and utilizing computational verification and validation techniques.

Specialized experience for the GS-15 level includes utilizing theoretical and computational tools to address complex electromagnetic (EM) issues, utilizing state of the art codes to design, analyze and predict the electromagnetic characteristics of various component designs, and utilizing computational verification and validation methodologies and techniques, including code-to-code and code-to-measurement as applied to computational electromagnetics and related tools and technologies.

## **Educational Qualifications**

Basic Education Requirement: A bachelor's degree from an accredited college or university with major study in engineering, physical science, mathematics, life sciences, computer science, or other field of science.

Degrees in engineering technology are not considered to be qualifying for this position. Required college majors for applicants qualifying on the basis of undergraduate or graduate education only: Aeronautical Engineering, Aeronautics, Aerospace Engineering, Astronautical Engineering, Astronautics, Astronomy, Astrophysics, Chemical Engineering, Electrical Engineering (except power), Electronics Engineering, Applied Mechanics, Mechanical Engineering, Engineering Mechanics, Nuclear Engineering, Nuclear Engineering Physics, Oceanography, Optical Engineering. Other majors will qualify if the major includes or is supplemented as follows: Biomedical Engineering, Chemistry, Computer Science, Computer Engineering, Mathematics (Pure or Applied), Physics, Applied Physics, Engineering Physics (or other related field), if includes or is supplemented by two courses in solid state physics, materials, optics, statics and dynamics, electricity and electronics, electron optics, kinetic theory of gases, electromagnetic propagation or radiation, semiconductors, vibration, high vacuum theory, information theory or heat transfer.

## **Requirements**

U.S. citizenship is required.

Occasional travel may be required.

## How You Will Be Evaluated

NASA uses an automated system (Resumix) that matches the competencies extracted from your resume to the competencies identified by the selecting official for the position. Based on the competencies you match, you are placed in one of three categories identified as 90, 80, or 70 pt. quality categories, which are defined as:

90 pt. Category - Tentatively meets (until subsequent confirmation upon referral) the basic qualification requirements identified in the vacancy announcement and has experience in the same or similar job that has demonstrated superior proficiency in the primary requirements of the position.

80 pt. Category - Tentatively meets (until subsequent confirmation upon referral) the basic qualification requirements identified in the vacancy announcement and demonstrates satisfactory proficiency in the primary requirements of the position.

70 pt. Category - Fails to meet criteria described in the 80 pt. category.

Additional application guidance is available in NASA's *Applicant Guide* ([https://resume.nasa.gov/applicant\\_guide.html](https://resume.nasa.gov/applicant_guide.html)).

Information for Veterans: The Category Rating Process protects the rights of veterans by placing them ahead of non-preference eligibles within each category. Preference eligibles who meet qualification requirements and have a compensable service-connected disability of at least 10 percent must be listed at the top of the highest quality category, except when the position being filled is scientific or professional at the GS-09 grade level or higher.

For the purpose of the Career Transition Assistance Program (CTAP) and the Interagency Career Transition Assistance Program (ICTAP), candidates rated in the top quality category are considered well-qualified.

## Benefits

NASA offers excellent benefit programs and competitive salaries. To learn more about pay and benefits at NASA, click *HERE* (<http://nasajobs.nasa.gov/benefits/benefits.htm> target=\_blank).

## Other Information

Any applicant tentatively selected for this position may be required to undergo a pre-employment background investigation.

Individuals who have special priority selection rights under the Agency Career Transition Assistance Program (CTAP) or the Interagency Career Transition Assistance Program (ICTAP) must be well qualified for the position to receive consideration for special priority selection. See 'How You Will Be Evaluated' for definition of well qualified.

Federal employees seeking CTAP/ICTAP consideration must indicate their eligibility when applying for a position. The USAJOBS resume asks you to identify your ICTAP eligibility; the NASA Supplemental Information asks you to identify your CTAP eligibility. If you are selected for the position, you must be prepared to submit proof that you meet the requirements for CTAP/ICTAP. This includes a copy of the agency notice, a copy of their most recent Performance Rating and a copy of their most recent SF-50 noting current position, grade level, and duty location.

As a condition of employment, male applicants born after December 31, 1959, must certify that they have registered with the Selective Service System, or are exempt from having to do so under the Selective Service Law.

In order to receive preference in hiring, you must clearly identify your claim for veterans preference on your resume.

U.S. citizenship is required. NASA's *Applicant Guide* ([https://resume.nasa.gov/applicant\\_guide.html](https://resume.nasa.gov/applicant_guide.html) *target=\_blank*) provides the information needed to assist you in determining whether or not you can claim 5 or 10 point veterans preference. You should not submit documents to prove your eligibility for veterans preference at this time. However, you must be prepared to submit proof of veterans preference (DD-214, and, if claiming 10-point preference, SF-15 plus proof required by that form) as requested by the Human Resources Office. Veterans preference will only be considered based on what is supported. For instance, if you claim 10-point preference, but are only able to document 5-point preference, you will be considered accordingly. If you fail to provide the required documents within the stated time period, we may withdraw a job offer and/or remove you from further consideration.

Your USAJOBS account asks you to assign a name to each of your resumes. When you apply to a NASA position, we will show you the text of the resume you have submitted, but we do not maintain the name you have assigned to that resume. If you wish to keep track of that information, we recommend you make note of it at the time you apply.

## How to Apply

This vacancy is being filled through NASA STARS, an automated Staffing and Recruitment System. NASA partners with USAJOBS in providing a seamless application process. Before you begin the application process, please read the vacancy announcement carefully and have all required information available. You may begin the process of submitting your resume by clicking on the 'Apply Online' link.

In order to be considered, you must submit a resume completed on the USAJOBS site. When completing your USAJOBS resume, please remember that NASA limits resumes to the equivalent of approximately SIX typed pages, or approximately 22,000 characters including spaces. You will NOT be allowed to complete the application process if your resume is too long or if your resume was uploaded to USAJobs from a second source. Additionally, NASA does not accept documents attached through USAJobs' document attachment feature.

Once you submit your resume to NASA, you will be asked to complete a short series of additional questions. You must finish the entire process in order to have a complete application package and receive consideration. Your answers will not be saved unless you finish the entire application.

You may edit a previously-submitted application, if the announcement is still open. For more information, see the *Applicant Guide*. ([https://resume.nasa.gov/applicant\\_guide.html](https://resume.nasa.gov/applicant_guide.html) target=\_blank)

If you are unable to apply electronically for this position, submit your resume and supplemental questions to: National Aeronautics and Space Administration (NASA), Resume Operations Center, Mailstop: HS50, Marshall Space Flight Center, AL 35812. DO NOT submit your resume directly to the Center advertising this vacancy. Mailed resumes must be received by the close of business on the closing date of the announcement. Hard copy resumes requirements are provided at: *Hard Copy Resume Requirements* (<http://nasajobs.nasa.gov/howtoapply/hardcopyresumes.htm> target=\_blank).

If you are a first time applicant, we recommend that you review NASA's *Applicant Guide* ([https://resume.nasa.gov/applicant\\_guide.html](https://resume.nasa.gov/applicant_guide.html) target=\_blank) to ensure that you are providing a complete resume. Failure to submit the supplemental data and a resume that contains all of the required information may result in loss of consideration for positions in which you are interested.

All applications must be received no later than midnight Eastern Time on the closing date of the announcement.

## Required Documents

NASA's application process has been specifically developed to ensure that we only ask you for the information we absolutely need to evaluate your qualifications and eligibility. In order to apply for this position, you only need to submit your resume and answer the screening questions and supplemental information. No additional documentation is accepted at the time of application. (For example you need not submit narrative 'KSA' statements; they are not required and will not be evaluated.) In this way we allow you to focus on preparing a resume that best describes your background and abilities. For assistance in preparing your resume, consult the *Applicant Guide* ([https://resume.nasa.gov/applicant\\_guide.html](https://resume.nasa.gov/applicant_guide.html) *target=\_blank*).

Nothing further is required until requested by the Human Resources Office. At that point, we may ask you to submit documentation to support statements made in your resume. For example, we may ask you to provide academic transcripts or proof of Federal employment status. If you are claiming veterans' preference, we may ask you to submit proof of veterans preference (DD-214, and, if claiming 10-point preference, SF-15 plus proof required by that form). If you fail to provide the required documents within the stated time period, we may withdraw a job offer and/or remove you from further consideration.

## What to Expect Next

Candidates for NASA positions are evaluated using our automated staffing and recruitment system, NASA STARS, which compares your skills and experience as described in your resume with the requirements of the position. If you are found to be a highly qualified candidate, you will be referred to the selecting official for further consideration. (In some cases, individuals with priority for special consideration must be considered and selected before other candidates.) Whether or not you are contacted for an interview depends upon the location of the position and the judgment of the selecting official.

At NASA, we pride ourselves on efficient and timely recruitment actions, and you can normally expect to learn the outcome of the selection process in a fairly short period of time. In addition, to ensure that you can measure progress for yourself, NASA provides you with regularly updated information on the status of the vacancy announcement.
